TABLE OF CONTENTS

Foreword

Definitions and Terms

Section I Summary Outline of the Fight-Flight Survival Reflexes

Page 1	Intro / theory Survival Systems
Page 2	Jaw Screening Protocol
Page 3	Atlas Stability thru Category I
Page 4	Posterior Switches & Posterior Gait
Page 5	Femur Head Integrity & Universal Cranial Fault
Page 6	Cranial Sutures & Anterior Gait
Page 7	Cranial Injury Complex
Page 8	Defensive Jaw Complex
Page 9	Coccygeal Release & Fascial Defense
Page 10	Pelvic Injury Complex
Page 11	Category II (Cranial Pelvis)
Page 12	Category II (Body Pelvis)
Page 13	Category III (Lumbar Discopathy)
Page 14	Scoliosis Protocol definition and evaluation
Page 15	Scoliosis Protocol steps (a) thru (e)
Page 16	Scoliosis Protocol steps (f) thru (n)
Page 17	Scoliosis Protocol steps (o) thru (z)

Section II Summary Outline Limbic System

Page 1	Limbic System (Immune Complex)
Page 2	Spinal Fixations
Page 3	Organ Reflexes
Page 4	Digestive Complex (Universal Jaw Complex)
Page 5	Digestive Complex (Digestive Jaw Complex)

Section III Summary Outline Endocrine System

Page 1	Endocrine System (Skin Reflexes)
Page 2	Primary Endocrine steps 1-3
Page 3	Primary Endocrine steps 4-5
Page 4	Cardiac Back Stress Syndrome
Page 5	Cardiac Back Stress Syndrome
Page 6	Blood Sugar Handling (Adrenal Protocol)
Page 7	Blood Sugar Handling (Adrenal Protocol)
Page 8	Digestive System Protocol
Page 9	Digestive System Protocol
Page 10	Ovary / Prostate Protocol
Page 11	Ovary / Prostate Protocol

Foreword

As a protégé of Dr. Ferreri since 1983, Dr. Mitchell Corwin has added many new dimensions to neural organization technique that are outlined in this and future manuals. It is Dr. Corwin's belief that one can learn this work in a fashion that is exciting, well organized, and mentally challenging. It should not be taken as a cookbook protocol to healthcare but as an eclectic approach, that shares the wisdom and expertise of many practitioners.

This manual represents an updated version of the original work of Dr. Carl Ferreri. It incorporates all the basic concepts of neural organization technique with emphasis on understanding the theory and application. Although there are some differences in description, application, and emphasis, the basic philosophy remains the same. For those that have taken prior instruction from Dr. Ferreri and / or other instructors, differences in opinion will exist. This work should not be construed as a separate entity from the original concepts of Neural Organization Technique but a natural outgrowth.

Advanced workbooks I & II discuss methodologies in Learning Disabilities and Neuro-Immuno-Therapy Techniques.

Workbook I include concepts of related emotional clearing techniques (deep level and deep hidden switching) originally developed by Dr. Charles Krebs that add considerable depth to the original work of Dr. Ferreri's learning disability protocols.

Workbook II is original work representing the latest enhancements of tissue and cellular repair and activation of the immune system. This work includes concepts developed by David Slater. His insights to the cause of disease bring forth a new idea and concepts that allow the practitioner to actively address chronic health issues in a fashion that restores the original design and inborn wisdom of the immune and nervous system.

These manuals are written in a format that assumes one is familiar with basic kinesiology concepts and knowledgeable of the location of many of the common neurolymphatic and neurovascular reflexes. While this manual can serve as a reference and study aid there is no substitution for a live lecture. This manual may be reproduced in any form for personal use. The content of N.O.W. manuals are copyrighted by Dr. Mitchell Corwin.

Acknowledgements

I would like to express my gratitude to the many colleagues that shared their knowledge, asked the right questions, and patients for presenting with challenging health conditions.

As with all new developments, a learning curve requires the meticulous process of pattern recognition and correlation with the commonality of reflex patterns of aberrant physiology and illnesses. This manual represents a culmination of over two decades of clinical work and study with Dr. Ferreri and contributing practitioners.
