# Foreword

The information presented in this manual represents the pinnacle and logical summation of neural organization work. It outlines a methodology to optimize our vitality and maintain youthfulness by restoring and maintaining the best health at any age. The prerequisites are an optimally functioning immune system built on a foundation of an intact nervous system. Here in lies the challenge for the health care practitioner to direct a renewed immune system and resolve chronic and hidden illnesses.

Advanced protocols described in this manual represent an eclectic knowledge base from years of study and the challenges brought forth in clinical practice. It is based on the prior work outlined in Manuals One and Two. Unlike the prior manuals, this work is 100% energetically based and requires an expertise level in energetic medicine practice.

The development of this manual would not have been possible without the shared knowledge and trainings of David Slater. His understanding of chronic illness, vibrational healing, and the hidden challenges our immune system faces created a logical format in which to use this work effectively and efficiently. He can be reached through his organization called Healers “Who Share” based in Westminster Colorado, US. (303) 428-4584. [www.healerswhoshare.com](http://www.healerswhoshare.com).

Much of the foundational energetic techniques utilized in this manual came from the shared knowledge and trainings of Dr. Vaughn Harada in Southern California. His expertise in biological dentistry, radionics, and fourth-dimensional healing has led to a workable format outlined in this manual.

As with all new developments, there will be a learning curve to develop a practical level of expertise. There is no substitute for the meticulous process of pattern recognition and correlation with the commonality of reflex patterns seen in chronic illnesses. This is an ongoing process and I anticipate there will be many contributions from practitioners’ worldwide and continuing updates. Please stay in touch via email and a future website where new information will be published.

To obtain this or prior manuals, please contact me at the information below. If you are interested in attending a workshop or would like to sponsor a workshop in your local area, please contact me.

# IMMUNO-THERAPY

**Introduction:** This work requires an expertise in energetic medicine and a competency level that comes with practice and devotion. Although the protocols outlined follow the basic concepts of anatomy and physiology, a comprehensive understanding of immune system function and common pathologies are required. Unlike the protocols of prior manuals, this work is 100% energetic in its application. Notwithstanding, to that which the practitioner can operate effectively in this domain, will define the outcome. Patience, concentration, and inquisitiveness are essential qualities as with the understanding that one's level of muscle testing competency and diagnostic skills will be directly proportional to one's knowledge base.

**Theory:** Longevity and or restoration of health require a competent immune system built on a foundation of an intact nervous system. An intact nervous system is established by addressing the basic survival systems of the basic workshop manual. Infectious microorganisms, environmental and food toxicities, iatrogenic factors, and inherited weakness are the main players that weaken our core immune system. Rebuilding the core immune system, (Spleen, Thymus, B & T Lymphocytes, and the CNS), is primary and teaching it how to effectively address and overcome chronic infection states is critical to regaining health.

Our immune system is constantly at work in maintaining the internal environment and cleaning up the mess our digestive leaves behind. Cumulative insults wear down our system down to a level of incompetency that invites opportunistic organisms. Essentially, the present state of health care offers these common alternatives:

- 1) Reduce the threat of microorganisms and eat healthy nutrient rich foods.
- 2) Allopathic approach utilizing a system of statistical correlation of the commonalities of pathological findings in illnesses.
- 3) Detoxify the body, liver and colon. Original concepts by Earl Irons.
- 4) Feed the weakened organ(s) via nutritional supplements first promoted by Royal Lee.
- 5) Develop a spirituality that places one in harmony with your surroundings and self.
- 6) Energetically recharge the body organs by restoring balance and harmony.

The sixth alternative listed above is where our emphasis lies. It will be a well-directed effort to rebuild the core immune system from the inside and restore it to a level for which it was originally designed.

**Discussion:** It is a fundamental concept and belief in neural organization work (N.O.W.) that everything that happens to us on a physical level must be processed through one or more of our primal survival systems. When a significant physical, chemical, or emotional trauma presents, then our nervous system will adapt in a fashion to optimize survivability. This process will often require a compensatory state as an adaptive mechanism for survival. Compensatory states, although imperative to our survival, reduce our overall efficiency. The key to neural organization work is to help the nervous system remove unnecessary compensations, thus restoring optimal function. It is this thought process of defusing the compensatory mechanisms from past illnesses and injuries that will be implemented in the following protocols.

# Core Immune System Enhancement

Update 4-2009

**Rebuilding the Core Immune System:** Our present working model of the “core” immune system function is comprised of three primary components with two sub-categories within the Thymus and Central Nervous System (*CNS*).

- 1) Spleen: Representing the home of the immune system, blood, tissue repair, and regeneration.
- 2) Thymus: Representing the white blood cells, the immune reactions of both humeral and cell-mediated responses:
  - a) B & T Lymphocytes.
- 3) CNS: A separate and closed system incorporating #2 above and subcomponents of:
  - a) B & T Lymphocytes.

**Important:** It is understood that three primary survival systems be 100% clear, as their function will be utilized in eye memory protocols outlined below.

**Additionally,** at the beginning of every session, it is imperative that following four protocols be clear:

**(1) Right (emotional) Jaw, (2) Left (physiological) Jaw followed by, (3) Universal Jaw, (4) Parietal Descent.** They must be cleared if present and corrected in this order.

The reactive Left Jaw indicates organ(s) that are in an active compensatory state and the Universal Jaw (eyes open) represents organ(s) in distress. Often you will find Parietal Descent / Gallbladder reflex showing up in the clear and can be addressed as outlined in Manual One page 6 by first activating / lifting parietals then correct left homolateral gait both anterior and posterior, K-27, spread maxillary suture, and lift parietals. A reactive Right Jaw if present represents an active emotional compensatory state, which will need to be cleared and possibly followed up with DHS protocols outlined in Manual II Section VII.

## 1) SPLEEN

**Evaluation:** Therapy Localize (*TL*) Spleen (over the organ) while energetically evaluating: ***“Immune System Function of the Spleen?”*** There usually will be an immediate weak response with any intact indicator muscle or, initiated by atlas *TL* (tongue thrust) and or occasionally *TL* of C-3 on the right.

**Note:** Resetting the atlas represents the main circuit breaker “enabling factor.” Incorporation of a memory reset via eye muscle corrections of all primary steps within the survival systems are utilized for the remaining steps. Because this immune system reset is energetic and essentially a neurological memory, a focused awareness by touching the primary reflex for each step in the protocols outlined below is essential. It is imperative to focus one's energetic awareness without any distraction on every step and thus it behooves the practitioner to periodically re-check all steps. Steps are serial in nature and errors or omissions will neutralize all benefits!

**Correction: (Spleen)** While contacting the appropriate reflex, right and left-brain hemispheric activity is engaged by lifting one leg and then the opposite. A sagittal suture tap is incorporated as momentary pause lock while memory resets are made with eye muscle corrections of up-to-the-left & up-to-the-right. This correction is utilized for all steps except the atlas reset.

- a) Reset Atlas (manual reset often requiring minimally 4-5 attempts with each leg raise).
- b) C-3 ...representing Cat I.
- c) TNNR ...representing cranial injury complex.
- d) Right Jaw ... representing defensive jaw complex.
- e) R-Jaw & Coccyx ...representing coccygeal release.
- f) Fascial Defense ...maintain stretch of neck fascia.
- g) Left hand on Right Jaw ...representing hard tissues of the body.
- h) Left Jaw ...representing Cat II.
- i) SP-21 ...representing Limbic system.
- j) Bilateral Jaw ...representing universal jaw.
- k) Digestive Jaw...Bilateral Jaw with Eyes closed ...representing digestive /chewing jaw.
- l) Left PMS ...representing endocrine system.
- m) While contacting SP-21, reset each component by contacting directly over each organ:
  - 1) Spleen
  - 2) Right & Left Liver
  - 3) Right & Left Small Intestine
  - 4) Hypothalamus.

## 2) Thymus (Lymphocytes ...Natural Killer Cells non-specific immune response)

**Evaluation:** Therapy Localize (*TL*) Thymus (over the organ) while energetically evaluating: ***“Immune System Function of the Thymus (lymphoid cells)?”*** There usually will be an immediate weak response with any intact indicator muscle or, initiated by atlas *TL* (tongue thrust).

### **Correction:**

- a) Reset Atlas (utilize forced dorsi-flexion of feet or atlas reset).
- b) C-3 ...representing Cat I.
- c) TNNR ...representing cranial injury complex.
- d) Right Jaw ... representing defensive jaw complex.
- e) R-Jaw & Coccyx ...representing coccygeal release.
- f) Fascial Defense ...maintain stretch of neck fascia.
- g) Left hand on Right Jaw ... representing hard tissues of the body.
- h) PIC ...pelvic injury complex (left hand on right jaw).
- i) Left Jaw ...representing Cat II.
- j) SP-21 ...representing Limbic system.
- k) Bilateral Jaw ...representing universal jaw.
- l) Digestive Jaw...Bilateral Jaw with Eyes closed ...representing digestive /chewing jaw.
- m) Left PMS ...representing endocrine system.
- n) While contacting SP-21, reset each component by contacting directly over each organ:
  - 1) Thymus
  - 2) Right & Left Lymphatics
  - 3) Right & Left Liver
  - 4) Right & Left Small Intestine
  - 5) Blood
  - 6) Hypothalamus

### 3) Central Nervous System

**Evaluation:** Therapy Localize (*TL*) CNS (place left hand behind head) while energetically evaluating: “**Immune System Function of the CNS?**” i.e. choroid plexus acting as the immune components unique to the CNS.” There usually will be an immediate weak response with any intact indicator muscle or, initiated by atlas *TL* (tongue thrust). This may or may not be present if there has not been a substantial immune challenge to the CNS.

#### Correction:

- a) Reset Atlas (utilize forced dorsi-flexion of feet or atlas reset).
- b) C-3 ...representing Cat I.
- c) TNNR ...representing cranial injury complex.
- d) Right Jaw ... representing defensive jaw complex.
- e) R-Jaw & Coccyx ...representing coccygeal release.
- f) Fascial Defense ...maintain stretch of neck fascia.
- g) Left hand on Right Jaw ... representing hard tissues of the body.
- h) PIC ...pelvic injury complex (left hand on right jaw).
- i) Left Jaw ...representing Cat II.
- j) SP-21 ...representing Limbic system.
- k) Bilateral Jaw ...representing universal jaw.
- l) Left PMS ...representing endocrine system.

While contacting SP-21, reset each component by contacting directly over each organ:

- 1) Choroid Plexus... (right & middle & left).
- 2) Supportive Cells... (right & middle & left).
- 3) Supportive Cells...(spinal canal & brain stem)
- 4) Hypothalamus

### 4) Macrophages (non-specific Immune response of monocytes)

Therapy Localize (*TL*) thymus (over the organ representing monocytes converting to macrophages ) while energetically evaluating: “**Immune System Function of macrophages?**” There usually will be an immediate weak response with any intact indicator muscle or, initiated by atlas *TL* (tongue thrust). This may or may not be present if there has not been a long standing immune challenge in the body

## Correction: (Macrophages)

- a) Reset Atlas (utilize forced dorsi-flexion of feet or atlas reset).
- b) C-3 ...representing Cat I.
- c) TNNR ...representing cranial injury complex.
- d) Right Jaw ... representing defensive jaw complex.
- e) R-Jaw & Coccyx ...representing coccygeal release.
- f) Fascial Defense ...maintain stretch of neck fascia.
- g) Left hand on Right Jaw ... representing hard tissues of the body.
- h) PIC ...pelvic injury complex (left hand on right jaw).
- i) Left Jaw ...representing Cat II.
- j) SP-21 ...representing Limbic system.
- k) Bilateral Jaw ...representing universal jaw.
- l) Left PMS ...representing endocrine system.

While contacting SP-21, reset each component by contacting directly over each organ:

- i. Thymus (representing macrophages)
- ii. Right & Left Lymphatics
- iii. Blood
- iv. Right & Left Liver
- v. Right & Left Small Intestine
- vi. Choroid Plexus... (right & middle & left).
- vii. Hypothalamus.

## 5) B Lymphocytes of the Body

**Evaluation:** Therapy Localize (*TL*) Thymus (over the organ) while energetically evaluating: ***“Immune System Function of the B Lymphocytes of the Body?”*** There usually will be an immediate weak response with any intact indicator muscle or the function will be intact, i.e. absent finding. B and T Lymphocytes represent cell mediated Immunity response. B Cells utilize clonal expansion.

### Correction:

- a) Reset Atlas (manual reset often requiring minimally 4-5 attempts with each leg raise).
- b) C-3 ...representing Cat I.
- c) TNNR ...representing cranial injury complex.
- d) Right Jaw ... representing defensive jaw complex.
- e) R-Jaw & Coccyx ...representing coccygeal release.
- f) Fascial Defense ...maintain stretch of neck fascia.
- g) Left hand on Right Jaw ... representing hard tissues of the body.
- h) Left Jaw ...representing Cat II.
- i) SP-21 ...representing Limbic system.
- j) Bilateral Jaw ...representing universal jaw.
- k) Digestive Jaw...Bilateral Jaw with Eyes closed ...representing digestive /chewing jaw.
- l) Left PMS ...representing endocrine system.
- m) While contacting SP-21, reset each component of the B Lymphocytes circuit:
  1. Thymus
  2. Right & Left Lymphatics
  3. Right & Left Liver
  4. Right & Left Small Intestine
  5. Blood.

## 6) B Lymphocytes of the CNS

**Evaluation:** Therapy Localize (*TL*) Thymus (over the organ) while energetically evaluating: **“Immune System Function of the B Lymphocytes of the CNS?”** There usually will be an immediate weak response with any intact indicator muscle or the function will be intact, absent finding.

### Correction:

- a) Reset Atlas (manual reset often requiring minimally 4-5 attempts with each leg raise).
- b) C-3 ...representing Cat I.
- c) TNNR ...representing cranial injury complex.
- d) Right Jaw ... representing defensive jaw complex.
- e) R-Jaw & Coccyx ...representing coccygeal release.
- f) Left hand on Right Jaw ... representing hard tissues of spine & cranium.
- g) Left Jaw ...representing Cat II.
- h) SP-21 ...representing Limbic system.
- i) Bilateral Jaw ...representing universal jaw.
- j) Left PMS ...representing endocrine system.
- k) While one hand is behind the head, reset each component of the B Lymphocytes circuit:
  - viii. Choroid Plexus... (right & middle & left).
  - ix. Supportive Cells... (right & middle & left).
  - x. Supportive Cells...(spinal canal & brain stem)
    1. Hypothalamus.

## 7) T Lymphocytes of the Body

**Evaluation:** Therapy localize (*TL*) Thymus (over the organ) while energetically evaluating: **“Immune System Function of the T Lymphocytes of the Body?”** There usually will be an immediate weak response with any intact indicator muscle or the function will be intact, absent finding.

### Correction:

- a) Reset Atlas (manual reset often requiring minimally 4-5 attempts with each leg raise).
- b) C-3 ...representing Cat I.
- c) TNNR ...representing cranial injury complex.
- d) Right Jaw ... representing defensive jaw complex.
- e) R-Jaw & Coccyx ...representing coccygeal release.
- f) Fascial Defense ...maintain stretch of neck fascia.
- g) Left hand on Right Jaw ... representing hard tissues of the body.
- h) Left Jaw ...representing Cat II.
- i) SP-21 ...representing Limbic system.
- j) Bilateral Jaw ...representing universal jaw.
- k) Digestive Jaw...Bilateral Jaw with Eyes closed ...representing digestive /chewing jaw.
- l) Left PMS ...representing endocrine system.
- m) While contacting SP-21, reset each component of the B Lymphocytes circuit:
  1. Thymus
  2. Right & Left Lymphatics
  3. Right & Left Liver
  4. Right & Left Small Intestine
  5. Blood.

## 8) T Lymphocytes of the CNS

**Evaluation:** Therapy Localize (TL) Thymus (over the organ) while energetically evaluating: ***“Immune System Function of the T Lymphocytes of the CNS?”*** There usually will be an immediate weak response with any intact indicator muscle. This commonly will need to be repeated if miasmatic factors are elevated.

### Correction:

- a) Reset Atlas (manual reset often requiring minimally 4-5 attempts with each leg raise).
- b) C-3 ...representing Cat I.
- c) TNNR ...representing cranial injury complex.
- d) Right Jaw ... representing defensive jaw complex.
- e) R-Jaw & Coccyx ...representing coccygeal release.
- f) Left hand on Right Jaw ... representing hard tissues of spine & cranium.
- g) Left Jaw ...representing Cat II.
- h) SP-21 ...representing Limbic system.
- i) Bilateral Jaw ...representing universal jaw.
- j) Left PMS ...representing endocrine system.
- k) While one hand is behind the head, reset each component of the B Lymphocytes circuit:
  - xi. Choroid Plexus... (right & middle & left).
  - xii. Supportive Cells... (right & middle & left).
  - xiii. Supportive Cells...(spinal canal & brain stem)
    1. Hypothalamus.

**Summary:** Completion of all seven steps above restores optimal function of the core immune system on the Tissue Repair Level at our present level of understanding. You are invited to implement the same on the cellular and DNA Levels. At the time of this righting, the author has not significantly investigated these deeper levels to date as there is so much to do on the surface / tissue level. I anticipate the utilization of deeper levels concerning tissue regeneration and neutralizing Cancer.

Identification and correction of B and or T lymphocyte function is highly suggestive there are chronic viral infections to be addressed. Optimizing Spleen function will allow the practitioner to address Toxicities (heavy metals ...mercury, lead, etc.). Including Thymus will expand the application to Bacterial, Parasitic, Fungal, and Yeast infections.

In treating moderate to severe chronic problems, common patterns will become apparent. Nasty herpetic viruses will have a tendency to tear down the immune system function of the CNS and B & T Lymphocytes. Although most respond well, some cases have resisted this therapy in that the virus is too potent for the immune system to handle or the core immune system has been devastated beyond “internal” repair solely utilizing this methodology.

With restoration of the above components of the immune system, there will be noticeable increase in vital life force. Once the major chronic infections are removed, miasms neutralized and the “fine-tuning” protocols outlined in Manual One Section III Pages 6-11 are completed, one will experience a vitality that will be readily apparent and long lasting. This will be a unique and welcomed experience.
